

Foreign Agriculture: A Review of Foreign Farm Policy, Production, and Trade; September, 1941 (Classic Reprint) (Paperback)

By U S Bureau of Agricultural Economics

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Foreign Agriculture: A Review of Foreign Farm Policy, Production, and Trade; September, 1941 Following these rain belts several vegetation zones appear. In the belt of 60 inches or more of rainfall is found the evergreen tropical rain forest, or selva, fringed on the north by a monsoon, or mixed-deciduous, forest less lofty than the selva and largely leafless during the short dry season. North of this lies the broad savanna, divided into the high-grass, low-tree savanna, or savanna-forest, with its coarse rank growth of grasses 5 to 12 feet high; the acacia, tall-grass savanna, where the fire-resisting trees stand scattered and the grass is good for pasture; and the acacia, desert-grass savanna, or thorn-bush steppe, which is sometimes a treeless savanna. In those sections where rainfall drops below 10 inches, a semidesert belt appears, with only desert shrubs and grasses, gradually changing into the arid desert shrub land of the southern Sahara. Each of these zones yields natural products of commercial importance; vegetable, animal, or both. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Reviews

This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).

-- Prof. Buddy Leuschke

Merely no phrases to spell out. I am quite late in start reading this one, but better then never. Your way of life period is going to be enhance once you complete reading this publication.

-- Joanie Hamill I
