# PERTURBATIVE AND NON-PERTURBATIVE APPROACHES TO STRING SIGMA-MODELS IN ADS/CFT

Springer-Verlag Gmbh Sep 2017, 2017. Buch Condition: Neu. Neuware - This thesis introduces readers to the type II superstring theories in the  $AdS_5 \times S^5$  and  $AdS_4 \times CP^3$  backgrounds. Each chapter exemplifies a different computational approach to measuring observables (conformal dimensions of single-trace operators and expectation values of Wilson loop operators) relevant for two supersymmetric theories: the  $N=4$  super Yang-Mills theory and the  $N=6$  Chern-Simons-matter (ABJM) theory. Perturbative techniques have traditionally been used to make quantitative predictions in quantum field theories, but they are...

## Reviews

*Good e book and valuable one. Better then never, though i am quite late in start reading this one. You are going to like how the article writer publish this publication.*

-- **Malcolm Block**

*Complete information for ebook fans. It is actually full of knowledge and wisdom I am pleased to inform you that this is basically the very best pdf we have read through inside my very own daily life and can be he very best ebook for ever.*

-- **Gideon Morissette**
