

A Geometrical Treatise on the Conic Sections; With an Appendix, Containing Formulae for Their Quadrature, C

Filesize: 6.56 MB

Reviews

A top quality publication as well as the typeface used was intriguing to learn. Yes, it is play, still an amazing and interesting literature. I discovered this publication from my i and dad suggested this book to learn.

(Prof. Louvenia Flatley)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1837 edition. Excerpt: .equiangular. Therefore LD: (c)H = HE: EP, and (16, 6, E.) LD. EP = DH HE = HD1 = HE. If the point A be in the arc of the opposite segment, and hd be drawn parallel to FL, and AE to PF, it will in like manner appear that Lrf EP = hd1 = AE1. Cor. 1. The points D and d being determined as directed in the proposition, LP: LD=LH: LP, and LP: hd = LA: Ld. The triangles DLH, HLP have the angle at L common to both, and the angles DHL, HPL equal, because each is equal to the angle HLK (29, 1, E. and 32, 3, E.), therefore they are equiangular; hence LP: LH = LH: LD (4, 6, E.), and LP: LD (= LP: LIP) = LH: LD (Cor. 19, 6, E.). In the same way it may be proved that LP: hd = LA: Lrf. Cor. 2. If E, the intersection of the chords, HA, PL, be between P and L, the points D, d will be on opposite sides of the point P. For in this case the chord LH will be greater than the chord LP, and the chord LA will be less; therefore LH will be greater than LP, and LA less; consequently (from Cor. 1) LD will be greater than LP, and Lrf less than LP. Cor. 3. If the chord HA which is parallel to the tangent PF, be supposed to approach...
