

The Falsity of the Grube Method of Teaching Primary Arithmetic: Thesis for the Doctorate in Pedagogy, Accepted May 1, 1894 (Classic Reprint) (Paperback)

By Saul Badanes

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Falsity of the Grube Method of Teaching Primary Arithmetic: Thesis for the Doctorate in Pedagogy, Accepted May 1, 1894 Numbers, according to Grube, are comprehended and recognised in the same manner as sensible objects hence the method of object-teaching is to be used also for teaching numbers. Further, every number, with all its component parts, from one to one hundred is to stand clear in the mind of the pupil; every number is to form what is called in the school of Herbert a method whole, and is to be taught in the same way as a plant in Botany; and as only a thorough observation of a plant leads to a clear percept of the plant, in the same way only thorough observation of a number leads to a clear percept of the number. Hence the consideration of number ought to be all-sided; all operations with numbers, and even the applied examples, are to serve merely to make clear the idea of an abstract number.
