## THE COMPOST-POWERED WATER HEATER: HOW TO HEAT YOUR WATER, GREENHOUSE, OR BUILDING WITH ONLY COMPOST

Countryman Press. Paperback. Condition: New. 176 pages. Dimensions: 8.2in. x 5.6in. x 0.6in. Here is a revolutionary approach for heating rooms and generating hot water. Author Gaelan Brown has worked with engineers and compost scientists to refine methods of composting that can heat greenhouses, barns, buildings, and hot water, all without combustion. It seems almost too good to be true: make high-value organic compost while generating reliable combustion-free heat. But it works, and this book is your practical introduction. With detailed case studies of large scale engineered systems and plans for constructing small DIY systems, you'll find step-by-step illustrations and photos to guide you through the process. A review of calculations to help you estimate the heating capabilities of various approaches and other planning tools make this book invaluable for compost heat recovery on any scale. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
