Thames & Hudson Ltd. Paperback. Book Condition: new. BRAND NEW, The New Mathematics of Architecture, Jane Burry, Mark Burry, New in paperback, "The New Mathematics of Architecture" is a survey of the most advanced contemporary architectural projects in the world that utilize new applications of mathematics for the digital age. From chaos to topology, from optimization to datascares, architects have been designing and constructing complex, sublime and beautiful buildings that change the way we perceive major structures. This one-of-a-kind survey of 46 international projects, compiled and written by leading experts on architectural mathematics, offers a thorough overview of how recent developments in maths and physics are being applied to architecture through accessible illustrations, lucid text and hands-on experience. Case studies are presented in detail with a project profile, and include Norman Fosters British Museum roof and Gehry Partners Disney Concert Hall, as well as projects by such renowned architects as Minifie Nixon, Kohn Pedersen Fox and Daniel Libeskind. At a time when architects have fewer opportunities to build and more time to consider the future of architecture, this carefully researched book offers students and practitioners new ways of thinking about the future of designing and building. Vital to the future of architectural dialect an awesome turn-on "Architects Journal". "Inside the subdued cover of this modestly sized book you will find analysis, description and beautiful photographs if architecture is like frozen music then this is a big mash-up of Prog Rock and Stockhausen. And that cannot be a bad thing." ("RIAS Quarterly").
