Magneto-Hydrodynamic Shock Structure Without Collisions (Classic Reprint) (Paperback)

By Cathleen S Morawetz

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Magneto-Hydrodynamic Shock Structure Without Collisions In this report we present a method for studying the internal structure of a magneto-hydrodynamic shock in which, in contrast to earlier theories, there are no collisions among the plasma particles. The theory yields us two distinct situations. In the first case, there is no shock. The ions and electrons pass through a region of changing magnetic and electric field and eventually they return to the state from which they started. In the second case, there is a definite change of state. Within the approximation we obtain a qualitative picture of the shock. The magnetic field rises and then oscillates with a characteristic wave length about a mean value greater than its initial value. The distribution function of the ions is greatly distorted. The approximation is based on an asymptotic development in the ion to electron mass ratio. It is valid over distances that are comparable to or even large compared to the wave length of the oscillation but small compared to the ion Larmor radius. Thus it is quite possible that an improvement..

Reviews

A whole new e book with an all new point of view. It is one of the most incredible book i actually have go through. I am easily could possibly get a enjoyment of reading through a written book.

-- **Nathanael Treutel**

Simply no terms to clarify. It is actually loaded with knowledge and wisdom I am just delighted to let you know that this is the very best publication i have got read through during my individual lifestyle and could be he very best pdf for actually.

-- **Mr. Caleb Quigley MD**
