Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Mammalian Hibernation: Proceedings of the First International Symposium on Natural Mammalian Hibernation, May 13 15, 1959 In violating the primary principle of homeothermism, the hibernators encounter problems which are unique in the mam malian and avian world. The mechanics of this almost purposeful abandonment Of the warm-blooded state are a challenge to the investigator, and the means by which the tissues and organs are able to function at such low temperatures are fruitful avenues for further research. These questions cry out for more basic ecology and more sophisticated physiological techniques. A good beginning only has been made in the fundamental biochemistry Of the problems involved. These same challenges attracted Claude Bernard and Raphael Dubois in the last century, but after their time there was only sporadic interest in hibernation until a reawakening which started in the European laboratories about twenty years ago. The interest spread to the New World. And the combined advance Of our knowledge in this field during the past decade has greatly accelerated. The purpose Of the conference was to bring this knowledge together. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
