Brand New Book ***** Print on Demand *****. 3rd EDITION: A book that could revolutionize the future of Cosmological Physics: Aristotle, Newton, Einstein, . The author presents a vision of the Universe from a totally different point of view, and in a disclosure way, and very easy to understand. It is a journey from the smallest (the dimension of Planck) to the largest (Our Universe boundary). And he also shows, in a clear way, which may be behind these limits. The new proposals on Scale Landscape and Scale Relativity raised in this book could be a breakthrough in the current state of the art of the cosmology, showing a new outlook for a better understanding of the Universe. This book will change our view about some common concepts (Energy, Matter, Time, Vacuum .) and also about other unusual concepts (Dark Matter and Energy, Quantum Fluctuations, Uncertainty Principle, Wave-Particle Duality, .), based on recent studies and theories (Emergence, Fractal, Scale Relativity, Holography, String-Branes, Quantum Gravity, .). Required reading for both: physics-cosmological experts, to explore an innovative proposal, as well as general public, that just would like to learn more about..
