

Transforming Clothing Production into a Demand-driven, Knowledge-based, High-tech Industry: The Leapfrog Paradigm (Hardback)

By -

Springer London Ltd, United Kingdom, 2009. Hardback. Condition: New. 2009 ed.. Language: English . Brand New Book. Recent trends in the fashion market (including an impressive increase in the number of new collections, product assortments and variants, and the emerging mass-customization model) dictate the need for a new approach. Transforming Clothing Production into a Demand-Driven, Knowledge-Based, High-Tech Industry discusses the ramifications of such an approach, which must lead to a drastic shortening of the whole cycle from conception to production and retail, as well as a shift from a labor-intensive to a technology- and knowledge-intensive clothing manufacturing industry. Transforming Clothing Production into a Demand-Driven, Knowledge-Based, High-Tech Industry is a collection of short papers from prominent researchers involved with the LEAPFROG (Leadership for European Apparel Production From Research along Original Guidelines) initiative. LEAPFROG proposes a revolutionary industrial paradigm based on research results in scientific-technological fields.
