

Contemporary Problems of Epistemology in the Light of Phenomenology (Paperback)

By Stathis Livadas

College Publications, United Kingdom, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book comprises a collection of 12 research articles pertaining to the influence of phenomenological analysis on current issues of epistemology, this one meant as a philosophy of science. Ten of these articles have already appeared in various research journals of the field at large and have been to a considerable extent re-edited, updated and in certain respects reworked. The remaining two are published originally for this book and naturally complement and invigorate the argumentation and the scope of the published articles. Overall, the content of the book can be described as an original attempt to demonstrate the relevance of Husserlian phenomenology with regard to theoretical questions arising from the contemporary evolution of such diverse scientific fields as the foundations of mathematics and the interpretation of quantum mechanics. Stathis Livadas has pushed the investigation of the foundations of mathematics and of present day physical theories out of a strictly analytic point of view, by considering a phenomenological approach on these matters. According to him mathematics and science present various ambiguous notions which cannot be, in principle, resolved by...
