THE FEAR FACTOR: FINDING PEACE IN A DESPERATE SOCIETY

Xulon Press. Paperback. Condition: New. 332 pages. Dimensions: 9.0in. x 6.0in. x 1.1in. This book is unique because it is the first book to reveal a neurophysiological connection between fear and many of our social and emotional problems. By studying how the brain processes fear, this effort unlocks the true sources and reasons for violence, hate, racism, substance abuse, intolerance and other societal ills. With this discovery, it is now possible to fully comprehend and appropriately answer some baffling questions. Does man really need God Who is the true and only Savior for all mankind Why do some Americans hate America From a neurophysiological perspective, is Islam a religion of peace Are some politicians controlled by fear Why cant some parents appropriately discipline their children What causes a seemingly nonviolent person to snap and become violent Dr. Philipp has discovered a flaw in mans brain that is responsible for todays emotional and societal ills and for the future of mankind. As a veterinarian, he developed this concept from observing fear reactions in animals and personal fearful events. From intensive Civil War and global wars research, he discovered a hotbed for racism and countless other emotionally-based societal ills. This information illustrates that mans brain cannot adequately process fear in certain instances. Since his curriculum involved intensive brain studies, he developed a curiosity about the brain and its ability to generate emotions. He was especially curious about racism because he observed children born during a war experience a fear that cannot be controlled. As these children mature the ability to control, or even recognize this fear, becomes very difficult as it may express itself as stress, painful negative emotions and associated behaviors throughout a lifetime. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
