Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1831 Excerpt: .growth of many provinces in Peru, delighting in a dry argillaceous or sandy soil, and growing on the declivities of the mountains, exposed to the intense heat of a vertical sun. Tt was first discovered by Don Hypolito Ruiz in 1780, in the province of Tarma, and Xanca; and subsequently by the same naturalist in the province of Huanuco, Huamalies, and Canta; and is found in abundance in the vicinity of Lima, on the high-lands of Puelles, and other hilly districts. It flowers nearly throughout the year; but blossoms most luxuriantly in October and November. It is gathered in large quantities, from which a beautiful extract is prepared, which, as well as the root, is imported to Portugal for improving the colour, astringency, and richness of red wine. From this use in the manufacturing of wine the Portuguese and Spanish merchants have kept its properties so...
