(PAPERBACK) book.

Fresh Insight Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Is there a single story that explains all the mysteries of the ancient world? The conventionally accepted story of mankind fails to explain numerous undeniable facts. Now genetics and evidence from the Earth s past climate and new archeology could be pointing to truths behind many mysteries. Maybe even the stories of the Flood, Atlantis and Aliens on Earth? - The centre of Northern hemisphere ice-cover in the last ice-age was in the Hudson Bay area, not at the current North Pole. Why? - Were the pre-clovis inhabitants of North America wiped out by a massive comet impact? - Is the reason for the very sudden end of the 1200 year younger dryas cold period recorded in human myths and religious ideas? - The huge constructions now under the sea must have preceded the Sumerian civilisation. Who made them? - Was the filling-in of the enclosures at Gobekli Tepe more important than what the enclosures were used for? - Farmers migrating from the fertile crescent into Europe carried a new DNA marker not present in previous populations in or around the Middle East. Where did it come from? - How was the huge megalithic and finely cut stonework made at Baalbeck, Giza, Cusco and Puma Punku, when the available stone and bronze tools are softer than the cut stone? From just three conjectures, Gods, Genes and Climate logically and scientifically explores an alternative history of the last 100,000 years - one that could explain all the mysteries.
