Neuropathology of Focal Epilepsies: An Atlas (Hardback)

By W. Teixeira

John Libbey Co, Australia, 2003. Hardback. Condition: New. UK ed.. Language: English . Brand New Book. Interdisciplinary co-operation between epileptologists, neuroradiologists, psychologists and neurosurgeons is the most fundamental prerequisite for localising and performing targeted resections of epileptogenic foci from patients with focal therapy resistant epilepsy. Worldwide there has been a steady increase in the number of epilepsy surgery centres, and in the number of operations performed on children and babies. A systematic neuropathological description is presented here involving macroscopic and histological findings. In this book, a systematic documentation of characteristic as well as rarer alterations is presented involving 444 patients who had been operated on in Germany between 1990 and 1997 at the Bethel Epilepsy Centre in Bielefeld. It includes 257 patients with temporal lobes (TLE) and 187 patients with extratemporal epilepsy (ETE).

Reviews

It is a of my personal favorite book. It is written in easy terms and never hard to understand. It has been designed in an exceedingly easy way and it is only after I finished reading this publication by which in fact changed me, change the way I think.

-- **Lucinda Stiedemann**

I just started out reading this ebook. It is really exciting through reading through time. Once you begin to read the book, it is extremely difficult to leave it before concluding.
