

Risk Assessment in Chemical Process Industries: Advanced Techniques

By F.I. Khan, S.A. Abbasi

Discovery Publishing House Pvt. Ltd., 1998. Hardcover. Book Condition: New. Searchshakhatnam refinery disaster of September 1997 was the worst industrial accident of the 1990s. The Bhopal gas tragedy of 1984 was the worst-ever such accident in the History of process industries. India, thus has the dubious distinction of setting two World records in the realm of industrial accidents within a span of 13 years. Indeed, during the last two decades India has witnessed thousands of industrial accidents involving fires, explosions, toxic releases or combinations of these. The experience of the rest of the developing world is similar - with increasing population, industrialization, and number of hazardous chemicals/process, the frequency as well as severity of industrial accidents is increasing. Why is the situation in the Third World Countries particularly grim? In these Regions it is common to find several Industries clustered together, with towns and villages lying in close proximity. Even when an industry sets itself up in a remote area, the griming neighbourhoods soon REACH its periphery. In such settings the impact of industrial accident on human lives as well as Property is always severe. How to deal with this situation? Attempts to Search for answers to this...

Reviews

Very good eBook and valuable one. This is for anyone who states that there was not a worth reading. You will not truly feel monotony at any time of your own time (that's what catalogs are for concerning if you question me).

-- Ms. Ona Muller

Very helpful to all of group of people. It is one of the most incredible pdf i have study. I am very easily could possibly get a satisfaction of studying a published ebook.
