Naval Innovation for the 21st Century: The Office of Naval Research Since the End of the Cold War (Hardback)

By Robert Buder

Naval Institute Press, United States, 2013. Hardback. Condition: New. Language: English . Brand New Book. The Office of Naval Research, known widely as ONR, was formed in 1946 largely to support the pursuit of basic science to help ensure future U.S. naval dominance--and as such, it set the model for the subsequently created National Science Foundation. But everything changed after the Cold War. The U.S. entered a period of greater fiscal constraints and the concept of warfare shifted from conventional land and sea battles and super-power conflicts to an era of asymmetric warfare, where the country might be engaged in many smaller fights in unconventional arenas. Naval Innovation in the 21st Century is a narrative account of ONR's efforts to respond to this transformation amidst increasing pressure to focus on programs directly relevant to the Navy, but without sacrificing the seed corn of fundamental science the organization helped pioneer. Told through the eyes of the admirals leading ONR and the department heads who oversee key programs, the book follows the organization as it responds to the fall of the Soviet Union, the terrorist attack on the USS Cole in 2000, and subsequent wars in Iraq and Afghanistan. These events...
