Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 Excerpt: .made tray under the bushes and knocking the berries off with a small paddle into it. By this method a picker can gather 6 to 7 bushels per day. Some leaves and trash fall in the tray with the berries, but all are dried together and then run through a fanning mill, which readily cleans the berries. Red raspberries, are soft and are usually marketed in pint boxes. The Cuthbert crop be sown, but in the drier portions of the plains States cultivation should be kept up until the fall to preserve soil moisture. Pinching and Pruning--Red raspberries require no summer pinching whatever, except a little the first year or so. The black-caps, however, should be nipped off as soon as they attain a hight of 18 to 24 inches. The following spring the laterals of the black-caps should be cut back to 1 to 2...
