

## The Natural History of Prince Edward Island

Filesize: 2.19 MB

### ***Reviews***

*This book will never be straightforward to start on looking at but extremely exciting to read. I actually have read through and that i am sure that i am going to gonna go through once more again in the future. I am happy to explain how this is the very best book i have read through in my individual lifestyle and may be he best publication for at any time.*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.5in. x 7.2in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: . . . grasses, except the Tall Fescue, yielding from one to three tons per acre. Orchard and Vernal Grasses thrive well, but are not much grown. CLASS III. --GYMNOGENS. Conifers. --Cone-Bearers. 73. This family contains our most important forest trees, useful alike to the farmer and the artisan. Their perennial foliage spreads heavy shadows all over our land, green amid the snows of winter as in the sunshine of summer. The White Pine (*Pinus strobus*) is the grandest, towering eighty to a hundred feet in height, and spreading its tasseled arms above the summit of the deciduous forest. Its long, slender leaves grow five in a bundle; cones long and pendulous. This tree affords the most valuable pine lumber, used for housefinishing, in cabinet-work, and wherever fine work is required. Red Pine (*Pinus rigida*) is a smaller tree with large, ovate cones and leaves in twos. It is not common. A considerable grove grows on the banks of Mill River. The Spruce (*Abies nigra*) is a large, heavy-foliaged tree of lofty conical form. Leaves quadrangular, erect. Cones ovate, and drooping. Its timber is used for rough-boards and shingles, in ship-building and for spars of vessels. 74. The Fir (*Abies balsamea*) is an elegant, tapering tree, with symmetrically divided branches. It grows on drier soils. Leaves flat. Cones erect, cylindrical, bluish. Fir timber is soft and light. It is used for fencing and for frames of buildings. Canada balsam, used in microscopy and other arts, is the produce of...
