## The physical review Volume 10

By American Institute Of Physics

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 266 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: . . . with Wiens law in determining other brightness temperatures through comparisons with the standardized palladium point were made by a photometric method by F. E. Cady, also of this laboratory and are believed to be known in consequence of repeated determinations and checks with an accuracy of the order of o. i per cent. The method of determining temperatures is given by the following equation Results. In the present paper only emissive powers in a direction normal to the surface or nearly so are considered. Values for other angles of emission may be computed with the aid of measured values of the deviation of the radiation from Lamberts cosine law. 1 The values there referred to, however, were obtained on unpolished material and must be so considered. The experimental values obtained, except that those obtained with single thicknesses of pyrometer glass have been corrected as...
