Excerpt from Leucoplakia Buccalis Et Lingualis, or Ichthyosis Linguae Successful Treatment With the Galvano-Cautery The disease is very rare, but its frequency can not be accurately determined, on account of the diversity of opinion which has been entertained by different writers with reference to its aetiology and diagnosis - a diversity which has caused; many cases to be placed in this class which do not properly belong in it. Professor Schwimmer saw only twenty examples out of five thousand cases of diseases of the skin and syphilis, and many others have not seen so large a proportion as this; but doubtless many cases are not recognized, and pass for constitutional syphilis. Most of the cases have been reported from Germany, France, and England, but some have been recorded in this country. So far the records show that the disease seldom affects any excepting males over forty years of age, though it has been observed as early as the thirty-second year, and a very few examples have been seen in women.
