Physical examinations showed the patient s condition to be temporarily improved. Patient No. 27. This patient, discovered during an investigation of the preceding 26 patients, left Rutland in June, 1908. Since discharge he has lived in 2 cities and 1 town, changing residences 6 times in four years. He has worked in 2 mills and has been an insurance agent. He has lived in 4 tenements and 2 boarding houses, and has taken meals in 24 restaurants. He travels daily in the electric and goes to the theatres weekly. Physical examinations show this man to be in an advanced stage of tuberculosis and a constant menace to persons with whom he comes in contact. A classification of the 27 patients investigated falls naturally into three groups: --Group A.--Those patients who were known to be alive on...
