Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 Excerpt: .and thus render the best of Portland cement mortar of but little more value than clay. This is a common fault in brick masonry that needs particularly to be guarded against in chimney construction. Portland cement mortar in the proportions of one measure of cement to three measures of sand will, if it is not robbed of its moisture, become harder than the chimney bricks, which it unites into one solid shaft of masonry. Such a chimney is an anchor to a wooden frame and not a pile of bricks to be supported by the frame. Protection Thousands of dwelling house fires have proved the of Woodwork necessity of safeguards about stoves, ranges, furnaces, and other containers of fire. These structural precautions are explained in municipal building ordinances and in the publications of the National Board of Fire Underwriters. They cannot be enforced in the...
