

A Statistical Account of Australia and New Zealand Volume 6

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Original publisher: Seattle, WA : U. S. Dept. of the Interior, U. S. Geological Survey, 2000. OCLC Number: (OCoLC)50191379 Subject: Computer simulation. Excerpt: . . . by and among scientists, decision makers, and stakeholders. Lets look again at the latter part of Castis quote on experimental models: . . . the model then serves to answer by direct experiment certain types of questions, such as how air flows over an airplane wing under different atmospheric conditions or how a particular types of clothes. . . look when draped over a perfect shape. (Casti, 1997, p. 13) This is precisely what any good model should do: help us to answer (and pose) questions certainly not a new revelation ! Thus, as I argued in the beginning, all good models are experimental models. A good experimental environmental model is one that is pragmatically objective and is outfitted with suitably numerous and appropriate knobs and levers. What I mean by knobs and levers can be anything from variables in an equation that represent some aspect of the particular environmental system (e. g. , earthquake...
