

What Every Manager Should Know about Big Data and Data Science (Paperback)

Filesize: 5.69 MB

Reviews

This composed pdf is fantastic. It normally will not expense too much. You will like how the writer write this publication.
(Dr. Jerald Hansen)

WHAT EVERY MANAGER SHOULD KNOW ABOUT BIG DATA AND DATA SCIENCE (PAPERBACK)**DOWNLOAD**

New Street Communications, LLC, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.

The need for precise, actionable, real-time Business Intelligence (BI) lies at the heart of the role of Big Data in modern commerce. In turn, the art of Data Science lies at the nexus of Big Data and BI, providing the essential methods by which BI can be extracted from Big Data's great black mass of constantly flowing, unstructured information. This combination has created a new profession: an elite and specialized class of highly-compensated professionals specially skilled at data cleaning, analysis, and visualization. We call them Data Scientists, and their evolving role in the organization is one about which managers must have a clear understanding. As shown in WHAT EVERY MANAGER SHOULD KNOW ABOUT BIG DATA AND DATA SCIENCE, integrating data scientists (and the general practice of Data Science) with the organization is often a delicate process involving the redefinition of traditional roles within the enterprise as well as dealing with issues of territoriality amongst peers. To accomplish this task, managers need a firm knowledge of the what and whys of Data Science, the specific BI needs it is uniquely positioned to service, and the processes by which it functions. Such is the knowledge this important book provides. CONTENTS: Preface The Vital Triangle What Is Big Data? Creativity and Intuition Making Something Out of Nothing Introducing Data Science to the Enterprise Avoiding Friction Between Old and New: Dealing with the TCQ Triangle The Evolving Role of the Data Scientist Data Science Ethics and Privacy Concerns The Art of Seeing Things Data Management Artificial Intelligence, Machine-Learning, and Deep-Learning in Data Science Data Curation and the Tribal Knowledge Problem Data Cleaning Data Modeling for Unstructured Data Predictive Analysis A Bit More...
