Oxford University Press Inc, United States, 1998. Paperback. Condition: New. New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.What would it cost the education system to adopt policies that emphasize science literacy for all students? How can we ensure that tests measure what educators, parents, and others want them to? How can universities set admissions policies that motivate K-12 institutions to produce science literate graduates? Project 2061 of the American Association for the Advancement of Science believes that serious efforts to reform the K-12 curriculum in this country require an understanding of the whole of education. To gain this kind of perspective, Project 2061 commissioned experts to prepare reports on a dozen areas of the education system that would have implications for the implementation of the reforms defined in their earlier volumes *Science for All Americans* and *Benchmarks for Science Literacy*. *Blueprints for Reform* is a summation of those reports offering teachers, parents, policymakers, business leaders, and others a starting point for their exploration of the education system and its response to reform. *Blueprints for Reform* includes discussions of equity, assessment, teacher education, policy, finance, school organization, curriculum connections, family and community, research, materials and technology, and business and industry. A chapter is devoted to each of these topics providing an overview of the issue and some recommendations on how to move forward. The idea behind this strategy is to bring current research together in one place so anyone working in the area of science education and reform can have complete access to the latest information, methods, and debates. To spark the kind of thoughtful debate that can lead to meaningful change, *Blueprints for Reform* also has an on-line component providing summaries of the chapters in the book, as well as a database of bibliographies and science...
