Brand New Book. Excerpt from Scientific Writings of Joseph Henry, Vol. 2 We have said that the chemical vibration is that which principally decomposes the carbonic acid in the growth of the plant; but we know that the heating impulse is an auxiliary to this, and that heat and moisture are essential elements in the growth of vegetation. The small amount of knowledge we already possess of the character of the emanations from the sun has been turned to admirable account in horticulture. In this branch of husbandry we seek even more than in agriculture - to modify the processes of nature; to cultivate the plants of the torrid zone amid the chilling winds of the northern temperate zone, and to render the climate of sterile portions of the earth congenial to the luxurious productions of more favored regions. We seek to produce artificial atmospheres, and to so temper the impulses from the sun that the effects of variations in latitude and the rigor of the climate...
