Createspace, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. A self-help, self-defense book to save men. And a get-rich-quick guide for women. In one of the most unique and personal self-help books to ever come along, a well-researched and personal account, Mitch Vandell gives name to and breaks down this widely familiar yet rarely recognized mental disorder into short, bite-sized chapters. These include the psychological enablers of leeching, an overview of basic leeching strategies, and the environmental and socio-economic risk factors involved in contracting the syndrome. You cannot always tell just by looking at a man if he suffers from this deadly syndrome. It is a silent killer from which no man is completely immune. Using a series of humorous case studies, Vandell presents his research and theories with in-depth analysis, incorporating psychology, social anthropology, and economic theory. How do socio-economic factors and culture influence leechism? How does the rise in consumerism and narcissistic values in society play a role in the increasing degrees of leechism? What can macro-economic models and the study of behavioral finance teach us about the syndrome? Learn how these methods, combined with conventional group therapy,...
