Issues in Head and Neck Cancer

By -

Byword Books. Hardcover. Condition: New. 144 pages. Dimensions: 11.3in. x 8.7in. x 0.6in. Head and neck cancer (HNC) is a rapidly evolving field of medical science. Tremendous progress has been made over the past five decades in revealing the basic molecular biology involved in the disease process, developing and adopting more effective organ-preserving treatment protocols and refining surgical ablative and reconstructive approaches to facilitate functional restoration of patients without compromising survival. We now have a much clearer understanding of the disease, its management and the rehabilitation of patients. But there is still much to be done. This book aims to cover a range of exciting new findings in clinical sciences, basic sciences and allied specialties with an emphasis on their relevance to HNC. This work promises to improve preventive and therapeutic strategies and will hopefully culminate in improved outcomes of HNC. The contributions have been made by established leaders in the field and every effort has been made to address the issue in a comprehensive, yet concise, manner for the benefit of readers. We believe that this book will be of value to established-in-training clinicians, scientists, allied professionals, as well as medical students who have inquisitive minds and wish to further...
