BEHAVIOR MODELS FROM 3D-SENSED BODY GESTURES AND AUDIO UTTERANCES (PAPERBACK)

Editions universitaires europeennes EUE, 2018. Paperback. Condition: New. Language: English . Brand New Book This research proposes deterministic and probabilistic generic multimodal behavior understanding models from body gestures and vocal utterances sensed by Microsoft Kinect technology. The proposed deterministic model is based on Moore Machine principles while the probabilistic model is a machine learning approach using Hidden Markov Models. The models have been implemented in a friendly graphical system which encompasses detecting, recognizing, discovering, learning, predicting and measuring human emotional..

Complete guideline for publication fans. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once yo u begin to read the book.

-- **Llewellyn Terry**

The best book i at any time read. I am quite late in start reading this one, but better then never. I realized this publication from my dad and i advised this book to understand.
