Lulu.com, United Kingdom, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Ann s idea was simple. The information contained within the servers documented people s lives. Places they ve been, things they ve said and done. All stored as discrete data points in computer memory. Ann s work joined the dots between these data points allowing software to piece together a complete account of these people s lives. Recreating a person s life from beginning to end. She had succeeded many weeks ago in implementing her software on the data set in the servers. But somehow it didn t really feel like progress. She could scroll through someone s entire life history in a matter of minutes, every single moment of it. But a history is all that it was. A life trapped forever in the past. She knew she could go further.
