By R a Griffin

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Chemical and Biological Characterization of Leachates From Coal Solid Wastes Detailed characterization of the wastes produced from coal conversion and processing is justified because of the volume of wastes produced and their extreme variability.

Characterization alone, however, is insufficient to determine acceptable disposal methods. The accessory and trace elements present may or may not be in a form that allows mobility; therefore, it is necessary to determine which elements can be leached from the wastes under which circumstances.
