Excerpt: . . . but a few words is found applicable to all the classes of integral numbers. In multiplication and division, the same striking results flow from the same cause; and General thus this simple principle, viz. the law of change *utwornunv. - . . .*, *bera. in* passing from one unit of value to another, is the key to all the operations in the four ground rules, whether performed on simple or denominate numbers. Thus, all the elementary operations of arithmetic are linked to a single principle *every opera-. , , . . .* Mon. ciple, and that one a mere principle of arithmetical language. Who can calculate the labor, intellectual and mechanical, which may be saved by a right application of this luminous principle 237. It should be the design of a higher Arithmetic to expand the mind of the learner over the whole science of numbers; to illustrate the most important applications, and to make manifest the connection between the science and the art. It will not answer these objects if the methods its requisite. of treating the subject are the same as in the elementary works, where science has to compromise with a want of intelligence. An elementary is not made a higher arithmetic, by Mmthm. i adlstinctire merely transferring its definitions, its principles, and its rules into a larger book, in the same...
