CBS Publishers & Distributors Pvt. Ltd., 2013. Softcover. Book Condition: New. First edition. BD Chaurasia`s Human Anatomy has been serving the interests of medical students as the most popular textbook because of the simplicity of its text, lucidity of expression, clarity of discussion and remarkably vivid detailing in the illustrations, making human anatomy most comprehensible to learn. The three volumes have steadily been enlarging to accommodate gross anatomy, histology, embryology and detailed clinical anatomy. Numerous colour line diagrams support the text of gross, surface and clinical anatomy. Because of the size, it is difficult for the students to revise the volumes prior to their class tests and examinations. The COMPANION POCKETBOOKS on the volumes have been designed and brought out giving only the essential components highlighting 'must know?' of anatomy. Content of each pocketbook is almost one third the size of the main volume, meant mainly for quick last minute revision of the 'volatile anatomy?'. The illustrations are aimed at helping the students review the topics easily as well as retaining and reproducing the information clearly in their examinations. Clinical aspects are included with equal intensity. Mainly meant for professional undergraduate students, they could also use these for quick reference during their clinical postings. HIGHLIGHTS OF VOLUME 3 Section I contains the foramina of skull bones of skull bones with their contents. Scalp, face, lacrimal apparatus, and deep cervical fascia with its extensions are described briefly. Boundaries and contents of Posterior triangle of neck, sub-occipital triangle and anterior triangle of neck are enumerated. Contents of vertebral canal and cranial cavity including cavernous sinus are mentioned. The three salivary glands, thyroid, and the parathyroid glands are briefly described. Muscles in the orbit, muscles of mastication...
