HIGH HARMONIC GENERATION FROM RELATIVISTIC PLASMAS

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Relativistic Similarity, Sub-attosecond Pulses, and Coherent X-rays | Laser technology has recently made accessible relativistic intensities. The contemporary relativistic laser-plasma physics is in urgent need of new ideas to explain the highly non-linear response of matter exposed to radiation driving electrons nearly to the speed of light. This book studies relativistic laser-matter interaction with emphasis on coherent X-ray generation and phenomena at the critical surface. The theory of relativistic spikes predicts the universal harmonic spectrum and the X-ray source's robustness, which were...

Reviews

Absolutely essential go through ebook. It is actually really intriguing through looking at time. I realized this ebook from my i and dad advised this publication to understand.

-- **Prof. Demetris Rau III**

A very great ebook with perfect and lucid answers. It can be packed with wisdom and knowledge I found out this book from my dad and i encouraged this publication to learn.
