By Spencer Scoular

Createspace, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Albert Einstein once wrote: The supreme task of the physicist is to arrive at those universal laws from which the cosmos can be built up by pure deduction. Remarkably, in this book we arrive at those universal axioms from which universal science can be built up by pure deduction. Within the prevailing paradigm of science - the mathematical philosophy of nature - we show it is not possible to unify science. To overcome this limitation we introduce a new, more general paradigm. Since the new paradigm is a generalisation of the mathematical philosophy of nature, we are able to retain the mathematical knowledge built up within the prevailing paradigm. Within the new paradigm we introduce four empirical universal axioms, from which we deduce that it is not possible to mathematically unify the two fundamental theories of physics - quantum theory and general relativity. Instead, from the universal axioms we logically deduce the first symmetry of nature, the first invariance of nature, the universal arrow of time, the universal laws of nature, and the three universal dynamic theories of nature - quantum theory, general...

Reviews

The book is great and fantastic. It usually does not price excessive. I am happy to tell you that this is the greatest ebook i actually have read during my personal existence and can be he very best ebook for possibly.
