Osteoarthritis is the most common form of arthritis, affecting over 21 million people in the United States. As Americans age, the number of people affected is expected to increase to 40 million by 2020. The pain of osteoarthritis causes people to stop exercising and leaves them vulnerable to all of the health risks associated with a sedentary lifestyle. Rather than making osteoarthritis worse, exercise actually helps you get better physically and emotionally. The physical benefits of water exercise include easier movements and more energy. The psychological benefits include increased independence, less depression and anxiety, and an overall feeling of well being. Water Exercises for Osteoarthritis will help you get all of this and more. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Perfect Paperback.
