# Agent-Oriented Software Engineering IX

Filesize: 2.55 MB

## Reviews

This ebook might be worth a read, and superior to other. It is probably the most remarkable book i have got read. Its been designed in an remarkably straightforward way and it is merely soon after i finished reading this publication where really modified me, alter the way i really believe.

*(Alex Zieme DDS)*

Condition: New. Publisher/Verlag: Springer, Berlin | 9th International Workshop, AOSE 2008 Estoril, Portugal, May 12-13, 2008 Revised Selected Papers | Software architectures that contain many dynamically interacting components, each with its own thread of control, engaging in complex coordination protocols, are difficult to correctly and efficiently engineer. Agent-oriented modelling techniques are important for the design and development of such applications. This book provides a diverse and interesting overview of the work that is currently being undertaken by a growing number of researchers in the area of Agent-Oriented Software Engineering. The papers represent a state-of-the-art report of current research in this field, which is of critical importance in facilitating industry take-up of powerful agent technologies.This volume constitutes the thoroughly refereed post-conference proceedings of the 9th International Workshop on Agent-Oriented Software Engineering, AOSE 2008, held in Estoril, Portugal, in May 2008 as part of AAMAS 2008. The 20 revised full papers were carefully selected from 50 initial submissions during two rounds of reviewing and improvement. The papers have been organized into four sections on: multi-agent organizations, method engineering and software development processes, testing and debugging, as well as tools and case studies. | Multi-agent Organizations.- Model-Driven Integration of Organizational Models.- MAS Modeling Based on Organizations.- A Systemic Approach to the Validation of Self-Organizing Dynamics within MAS.- Method Engineering and Software Development Processes.- Using and Extending the SPEM Specifications to Represent Agent Oriented Methodologies.- Definition of Process Models for Agent-Based Development.- Methodology Fragments Definition in SPEM for Designing Adaptive Methodology: A First Step.- A MAS Metamodel-Driven Approach to Process Fragments Selection.- An Evaluation Framework for MAS Modeling Languages Based on Metamodel Metrics.- A Unified Graphical Notation for AOSE.- Prometheus and INGENIAS Agent Methodologies: A Complementary Approach.- The Formal Semantics of the Domain Specific Modeling Language for Multiagent Systems.- Evaluating an Agent-Oriented Approach for...
