Sensor Technologies: Impulses for the Raw Materials Industry

By Karl Nienhaus

Shaker Verlag Feb 2014, 2014. Buch. Condition: Neu. Neuware - How to use our resources most efficiently is a key economic and contentious political issue today. Resource utilization strategies of Germany as well as of the European Union demonstrate that resource shortage is a recognized socioeconomic problem. Consequently, as private businesses and corporations aim to increase resource efficiency and maintain yield, politicians are spurring the politically mandated development of research projects in the areas of efficient raw material extraction, processing and recycling. The efficient and responsible exploitation of deposits as well as improved recycling technologies are crucial in light of an increasing demand for raw materials worldwide. Economic growth in industrial and emerging countries, rising living standards and the need to maintain economic power all require a secure raw material supply. As a result, responsible handling of primary and secondary raw material resources is continuously gaining importance. By applying modern technologies, raw materials are mined, recovered and recycled more efficiently with significant increases in sustainability. In particular, sensor technologies combined with intelligent systems for data evaluation play a significant role here. The use of innovative sensor technologies leads to higher levels of automation, increased recoveries in primary and secondary raw...
