Einstein was faced with the incompatibility between the constancy of the speed of light and the principle of relativity. It should have been obvious to him that the speed of light was not constant. The original experiments that led to this belief were flawed. Instead, Einstein dropped two of what he called unjustifiable hypothesis from classical mechanics; that time and space were fixed. Theory of Reality is a short allegory. Logic is used to replace the concepts of relativity with new concepts of reality. Johnbat, the main character, systematically examines the logic behind special relativity pointing out flaws in the original definitions, experiments and logical conclusions that Einstein used to develop his theory. A new Theory of Reality is presented as its replacement. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
