RADIATIVE CORRECTIONS FOR EE- COLLISIONS PROCEEDINGS OF THE INTERNATIONAL WORKSHOP HELD AT SCHLO

Springer. Paperback. Condition: New. 349 pages. In recent years the Standard Model of electroweak interactions has successfully passed a number of crucial tests, most notably in neutral current reactions and through the observation of W- and Z-bosons in proton-antiproton collisions. However, experiments are only beginning to verify one of the most basic consequences of its theoretical formulation as a local quantum field theory: quantum corrections as calculated in perturbation theory. Measurements that will be carried out at electron positron..
