Here, innovation thought leader Elaine Dundon offers a how-to prescription for building creative and strategic innovation skills at all levels of an organization (rather than focusing on decision-making levels only) -- and explains how to produce measurable results that translate directly to the bottom line. Using field-tested concepts and practical examples, and featuring easy-to-apply processes and concrete thinking tools, this straight-talking book provides a broadly applicable guide to innovation -- one that is not limited to a specific industry sector. Today's most comprehensive, one-stop innovation resource, it describes: \* The three necessary components of innovation -- creative, strategic, and transformational thinking \* Methods for applying innovative thought to existing products, processes, and business models \* 90 great innovations and 90 trends to consider.
