Pervasive cyber attacks against the United States could have a serious impact on national security, the economy, and public health and safety. The number of reported cyber incidents has continued to rise, resulting in data theft, economic loss, and privacy breaches. Federal law and policy assign various entities responsibilities for securing federal information systems and protecting critical infrastructures. GAO has designated federal information security as a high-risk area since 1997 and in 2003 expanded this to include cyber critical infrastructure protection.
