Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Life on the Frontier: An International Comparison of Scientists in an Emerging Field Through an analysis of published sources, including books, journal articles, and conference proceedings for the two-year period from 1988 to 1989, we identified more than researchers worldwide working on the subject of neural networks. From this material, we were able to determine the exact address for each of researchers in thirty-five different countries. Given the scope of the research community, a survey questionnaire was determined to be the most appropriate method of investigation. A twelve-page questionnaire in English was sent to researchers inquiring about (a) their neural network activities, (b) their decision to begin working on neural networks, (c) factors that might lead them to cease their neural network research in favor of another problem area.
