

Innovations in Physiological Anaesthesia and Monitoring

By -

Springer. Paperback. Condition: New. 179 pages. Dimensions: 9.5in. x 6.7in. x 0.4in. At present there are going on decisive developments in the introduction of physiological thinking into anaesthesiological practice. These innovative motion comprises applications taken from space physiology, closed-circuit ventilation systems, neurophysiologic control of circulation and ventilation together with innovative aspects of circulation physiology and respiration physiology. Involved are innovative aspects of neuromuscular blockade, volatile anaesthetics, cardiorespiratoric monitoring, haemodilution and blood substitution. Special emphasis is put on demonstrating the closed circuit system as a combination of anaesthesia system and monitoring system in daily clinical routine. Additional knowledge and investigation are stimulated in the fields of anaesthesia, neurophysiology, pharmacology, space medicine and metabolic physiology using non-invasive methods of monitoring like the evaluation of the neurovegetative status of man and its adaptive changes. Combining these aspects and systems will provide a quite new analytic and synergetic power in the direction of physiological anaesthesia and monitoring which finally will result in a totally new system of a physiological micro-anaesthesia. We recommend this book therefore to all anaesthetists, clinical physiologists and pharmacologists as well as to physicists and engineers interested in innovative and non-invasive methods in physiology of closed systems....
