

Herbaceous (Paperback)

By Paul Evans

Little Toller Books, United Kingdom, 2018. Paperback. Condition: New. Language: English . Brand New Book. As climate change erodes the familiar pattern of the seasons, we turn instinctively to the life cycles of herbaceous plants to guide us through the year. The growing, flowering, seeding and dying back of wild flowers, weeds, herbs and garden perennials sustain and enrich our lives. Herbaceous is a journey which follows the colour pulse of plants through the year, looking for the new and emerging rhythms. Beginning with the bright yellow, followed by the vernal whites of spring and the pinks of summer, the blues of early autumn and finally the browns of seeds set as winter comes. Herbaceous is gardening with words - asking us to look again at our relationship with plants and celebrates their power to nourish our spirits.

Reviews

Absolutely among the finest pdf I have got possibly read. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Prof. Lois Cormier II**

The most effective publication i at any time go through. This is certainly for all those who statte that there had not been a worthy of looking at. Its been printed in an extremely straightforward way which is merely soon after i finished reading this publication where basically changed me, change the way in my opinion.
