## Mathematical Questions and Solutions, from the Educational Times. Volume 34

By Anonymous

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 edition. Excerpt: . or impossible) formed by the three links and the line of centres shall be equal to zero. Professor Sylvester states that Roberts two cases of inverse conical 3-bar motion are special cases of unicursal 3-bar motion. Solution by Samuel Roberts, M.A. Professor Cayley has shown Mathematical Society s Proceedings, Vol. IV., pp. 109, 110) that the condition specified in the question is sufficient, and notices the cases of reduction of order. To show the necessity of the condition, I consider that in general the curves described by points rigidly connected with the traversing bar, have a one-to-one correspondence, and have therefore the same deficiency. We may therefore regard a point on the traversing bar as describing the locus, and since the extremities of the links which rotate describe exceptional loci, we will suppose the describing point different from these. The locus described is...

### Reviews

*A fresh e book with a new viewpoint. It is among the most awesome ebook we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Prof. Christelle Stark III**

*This ebook might be worthy of a read, and far better than other. it was writtern really flawlessly and useful. I found out this pdf from my i and dad recommended this ebook to learn.*

-- **Prof. Ruben D'Amore PhD**
