Hydrocarbon and Petroleum Geology of France

By -

Springer. Paperback. Condition: New. 446 pages. Dimensions: 11.5in. x 8.2in. x 1.1in. This volume contains proceedings from a special session devoted to the hydrocarbons of France, which was held during the 4th Annual Conference of the European Association of Petroleum Geoscientists and Engineers at the Palms des Congrès, Paris, from 1 to 5 May 1992. The conference took place in parallel with the 54th Meeting of the European Association of Exploration Geophysicists. Altogether there were some 4500 attendees at both. This volume also contains additional papers selected to provide a more complete review of regional and thematic research currently being undertaken to improve the efficiency of hydrocarbon exploration and production in France. This volume is composed of 32 chapters corresponding to five regional topics. Chapters 1 to 4 (Part 1) are general introductions and statistics on exploration-production of hydrocarbons and underground gas storage in France. Chapters 5 to 12 (Part 2) concern the Paris Basin (where about 61 and 3.7% of domestic oil and gas are currently being produced) and the neighboring offshore French Western Approaches. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
