LINEAR FRACTIONAL DIFFUSION-WAVE EQUATION FOR SCIENTISTS AND ENGINEERS

Birkhäuser. Hardcover. Condition: New. 490 pages. This book systematically presents solutions to the linear time-fractional diffusion-wave equation, which describes different physical phenomena and interpolates the Helmholtz equation and the classical diffusion equation, on the one hand, and the standard diffusion equation and the wave equation on the other. It introduces the integral transform technique and discusses the properties of the Mittag-Leffler, Wright, and Mainardi functions that appear in the solutions. The time-nonlocal dependence between the flux and the gradient of...

Reviews

It is one of my personal favorite books. Sure, it is engaging, continue to an amazing and interesting literature. I am quickly could possibly get a enjoyment of looking at a published book.

-- **Wellington Rosenbaum**

This type of book is almost everything and helped me hunting forward and more. I was able to comprehend almost everything using this published pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.
