

Phytochemical studies on Goniothalamus species

Filesize: 5.69 MB

Reviews

It becomes an incredible publication that we actually have at any time read. It is one of the most incredible book i actually have go through. I am just delighted to tell you that this is actually the finest pdf i actually have read through within my personal life and might be he finest publication for actually.

(Prof. Hilma Robel)

PHYTOCHEMICAL STUDIES ON GONIOTHALAMUS SPECIES

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Goniiothalamus uvarioides and Goniiothalamus velutinus belonging to the Annonaceae family have been used in traditional medicine for the treatment of giddy, injury, diarrhea, aphrodisiac, body pain, cold, stomachache, swollen, headache, food poisoning, to maintain body health and as mosquito repellent. The phytochemical studies of G. uvarioides and G. velutinus were carried out. Two alkaloids, one styryllactone (styrylhydropyrone) and two flavonoids have been isolated. These compounds were characterized by spectroscopic analysis, chemical methods and by comparison with the published and data. The identified compounds were velutinum, aristolactam-BII from G. velutinus, and pinocembrin, goniiothalamine as well as 5,7,4'-trihydroxyflavone (naringenin) from G. uvarioides. Compound S4 presented LD50 lower than 100 ppm while compound S5 showed LD50 lower than 10 ppm against Artemia salina. In addition, compound S5 displayed potent antibacterial activity towards Gram positive bacteria tested in the study. | Format: Paperback | Language/Sprache: english | 80 pp.
